III. Proofreading and Error Correction (10%)

Directions: The following passage contains TEN errors. Each line contains a maximum of ONE error. In each case, only ONE word is involved. You should proofread the passage and correct it in the following way. For a wrong word, underline the wrong word and write the correct one in the blank provided at the end of the line. For a missing word, mark the position of the missing word with a “^” sign and write the word you believe to be missing in the blank provided at the end of the line. For an unnecessary word cross out the unnecessary word with a slash “/” and put the word in the blank provided at the end of the line.

If it were only necessary to decide whether to teach elementary science to everyone on a mass basis or find the gifted few and take them as far as they can go, our task would be fairly simple. The public school system, therefore, has no such choice, for the jobs must be carried on at the same time. Because we depend so heavily upon science and technology for our progress, we must produce specialists in many fields. Because we live in a democratic nation, which citizens make the policies for the nation, large numbers of us must be educated to understand, to support, and when necessary, to criticize the work of experts. The public school must educate all the producers and users of scientific services.

In education, there should be a good balance between the branches of knowledge that attribute to effective thinking and wise judgment. Such

balance is defeated by too much emphasis on any one field. This question

of balance involves not only the relation of natural sciences, the social sciences, and arts but relative emphases among the nature sciences themselves.

Similarly, we must make a balance between current and classical knowledge. The attention of the public is continually drawn to now possibilities in scientific fields and the discovery of new knowledge; these should not be allowed to turn our attention away from the sound, established materials that form the base of courses for beginners.

IV. Reading Comprehension (30%)

In this section there are four passages followed by a total of fifteen multiple-choice questions. Read the passages and then mark your answer in your ANSWER SHEET.

Text 1

①The decision of the New York Philharmonic to hire Alan Gilbert as its next music director has been the talk of the classical-music world ever since the sudden announcement of his appointment in 2009. ②For the most part, the response has been favorable, to say the least. ③“Hooray! At last!” wrote Anthony Tommasini, a sober-sided classical-music critic.

① One of the reasons why the appointment came as such a surprise, however, is that Gilbert is comparatively little known. ② Even Tommasini, who had advocated Gilbert's appointment in the Times, calls him "an unpretentious musician with no air of the formidable conductor about him." ③ As a description of the next music director of an orchestra that has hitherto been led by musicians like Gustav Mahler and Pierre Boulez, that seems likely to have struck at least some Times readers as faint praise.

①For my part, I have no idea whether Gilbert is a great conductor or even a good one. ②To be sure, he performs an impressive variety of interesting compositions, but it is not necessary for me to visit Avery Fisher Hall, or anywhere else, to hear interesting orchestral music. ③All I have to do is to go to my CD shelf, or boot up my computer and download still more recorded music from iTunes.

①Devoted concertgoers who reply that recordings are no substitute for live performance are missing the point. ②For the time, attention, and money of the art-loving public, classical instrumentalists must compete not only with opera houses, dance troupes, theater companies, and museums, but also with the recorded performances of the great classical musicians of the 20th century. ③These recordings are cheap, available everywhere, and very often much higher in artistic quality than today's live performances; moreover, they can be "consumed" at a time and place of the listener's choosing. ④The widespread availability of such recordings has thus brought about a crisis in the institution of the traditional classical concert.

①One possible response is for classical performers to program attractive new music that is not yet available on record. ②Gilbert's own interest in new music has been widely noted: Alex Ross, a
